

To all Technical Intern trainees and Workers

How to prevent Infectious Disease such as the New Coronavirus.

We think everyone is worried about the outbreak of the New Coronavirus infectious disease.,

Corona virus is a disease that can be prevented, please take the following precautions individually.

- 1) Try to stay away from crowded places such as Shopping Center and Events.
- 2) Wash your hands (when you get home, before cooking and eating your meal, after using the toilet etc.)
- 3) Coughing Etiquette :
wear a mask and cover your mouth when you cough, using tissue or handkerchief or sleeve. (do not cough directly using your hands)
- 4) Regularly changing of air in your room (ventilate the room)
- 5) Food must be cooked well (heat your food / avoid raw food)
- 6) Serve and eat your food individually.
- 7) Do not touch used mask or used tissues directly.
(Place a garbage cellophane in your waste paper basket)

If you want to inspection, a report to the local Government will be needed.

If you are not good in condition, please report to the company and Urban Planning.
